

"A company committed to recycle and achieve maximum returns on site generated waste."

Ray Willis, Senior Project Manager,
Galliford Try

CASE STUDY

Chesil Street Extra Care, Winchester

GALLIFORD TRY

Site Recycling Rate: 96.13%

The Contract

The construction of an extra care sheltered housing development in the centre of Winchester to provide a contemporary styled home for older residents. The development comprises 52 self-contained apartments on the upper floors with communal lounge, cafeteria and other ancillary facilities for residents on the ground floor. Galliford Try were looking for a local waste management company who could segregate the waste onsite within the busy city centre and efficiently and safely remove it. Maintaining and maximising the recycling rates of all waste was a key priority.

Waste Solutions

Raymond Brown provided the following solutions to Galliford Try:

- Full segregation provided on site for the following waste streams to maximise recycling rates and generate cost savings:
 - Cardboard
 - General Mixed Waste
 - Metal
 - Plasterboard
 - Soil and Stones
 - Wood
- Provision of 6 and 8 yard crane tested skips and 20 and 40 yard roll-on/roll-off's.
- Next day skip delivery and collection.
- Bespoke site solution created to identify the specific skips and ensure they were positioned clearly with full site signage to assist with onsite segregation and collection.
- 24 Hour access to Weighsoft Portal for full site waste reporting, invoicing and ticket information.
- Assistance with the development of the Site Waste Management Plan.
- Dedicated Customer Account Manager.
