

“The excellent service and recycling rate by Raymond Brown delivered on this high profile, prestigious project helped us to meet our targets and secure a satisfied client. Thanks!”

Richard Batterson, Project Manager
Dawnus

CASE STUDY

Newbury Racecourse

DAWNUS CONSTRUCTION

Site Recycling Rate: 95.57%

The Contract

Dawnus were undertaking the design and construction of new BREEAM Excellent targeted racecourse facilities. The Heartspace forms a critical development landmark of the overall masterplan of Newbury Racecourse. Dawnus were looking for a waste management company who could work with the site team in the associated challenging live environment as they ensured the racecourse remained fully operational throughout the duration of the project.

Contract Value / Duration

£5.3m / 49 Weeks

Waste Solutions

Raymond Brown provided the following solutions to Dawnus to ensure:

- Full segregation was provided on site for the following streams to maximise recycling rates and generate cost savings:

Concrete	Green Waste	Plasterboard
Carpet	Hardcore	Plastic
General Mixed Waste	Metal	Wood
- Bespoke site solution created to ensure that Dawnus could recycle as much waste as possible whilst ensuring that there were minimal disturbances to the racecourse.
- The provision of both open and enclosed 8 yard skips and 15 yard Roll-on/Roll-off's onsite with full site signage to assist with onsite segregation.
- 24 Hour access to Weighsoft Portal for full site waste reporting, invoicing and ticket information.
- Assisted with the development of the Site Waste Management Plan to comply with BREEAM Excellent targeted rating.
- Dedicated Customer Account Manager.
- Next day skip delivery and collection.
